PROFESSIONAL SUMMARY

Backend-focused junior full-stack developer with experience designing and building web applications using Node.js, Express, MongoDB, and Vue/Nuxt. Strong interest in backend systems, including API design, data modelling, and server-side logic. Comfortable working across the full stack, with practical frontend experience and a focus on building reliable, maintainable systems. Quick learner with a methodical approach to problem-solving and system design.

WORK HISTORY

Independent Web Developer (Backend-focused), 07/2022 to current
Self-Employed - Burnley, Lancashire

- Designed and developed **full-stack web applications** using **Node.js, Express, MongoDB, and Vue.js (MEVN)**
- Implemented **backend application logic**, including data models, validation, and API endpoints
- Designed and maintained **MongoDB schemas**, managing **hundreds of records** with consistency and integrity
- Built applications from **client requirements to working systems**, following **MVC architecture** and basic security practices

Postmaster, 06/2023 to current
Williams Road Post Office - Burnley, Lancashire

- Operated within **highly regulated, system-driven workflows**, handling sensitive transactions and customer data
- Followed strict **security, verification, and compliance procedures** with consistent accuracy
- Managed routine administrative processing and record handling in a high-volume environment
